BS(CS)

Virtual University

2024 - Present

ICS

FBISE

2021 - 2023

## expertise

- Full-stack web developer
- User Experience

## skills

- React & Next
- Node JS(Backend)
- SQL & NOSQL DB
- Git / Github
- User Experience

## about me

I'm a highly skilled full-stack developer with 2 years of experience in designing and building scalable web applications using modern front-end and back-end technologies.

## work experience

### Invotyx

front-end engineer | 2024 - Present

I worked as a Front-End Engineer, where I focused on designing and implementing responsive and user-friendly interfaces. My role involved transforming complex design ideas into functional web applications, optimizing performance, and ensuring seamless user experiences.

### Codegenio

full-stack developer | 2023 - 2024

, I worked as a Full-Stack Developer, responsible for both front-end and back-end development. I developed and maintained web applications, ensuring seamless integration between the client and server-side.

### Freelancing

tech-lead | 2023 - Present

I guide and oversee the technical direction of projects, ensuring best practices in development, architecture, and problem-solving. I lead a team of developers, providing mentorship, conducting code reviews, and ensuring the successful delivery of high-quality solutions.

## projects

### lota

**front-end** | June-2024 - Present

I developed the front-end of a university course management platform using Next.js. This platform enables instructors and admins to upload and manage courses, with instructors able to add students and input grades. It provides students with an overview of their semester grades and predicts future grades based on the remaining assessments. My work focused on ensuring an intuitive, user-friendly interface and smooth interactions to enhance the overall user experience for both instructors and students.

### MyFormatic

**front-end** | Aug - 2024 - Present

For the Myformatic project, I worked on the front-end of a task management platform, similar to Trello. The platform allows users to organize and track their tasks with boards, lists, and cards, offering a seamless drag-and-drop experience. My focus was on creating an intuitive, responsive user interface that allowed users to efficiently manage their tasks and collaborate with others in real-time.

### Scoutxtra

**full-stack** | Aug- 2023 - Jun -2024

I worked as a full-stack developer on a comprehensive football club management platform. This platform includes key features such as tactics management, where coaches can plan and communicate strategies for matches, and a messaging system that allows coaches, players, and staff to communicate effectively. Additionally, the platform offers various tools for team management, scheduling, player performance tracking, and more. My role involved both front-end and back-end development, ensuring smooth functionality and an intuitive user experience across the entire platform.
